

NEW
"TWIST"
HANDLE

Hyqual Australia would like to introduce the brand new "Twist" Handle as part of our non-combustible coffin-handles range. The "Twist" Handle has been produced to fit in between the fixed bar handle and the drop bar handle.

It is easy and comfortable to carry with, and has ample room for larger hands to secure a good grip. Adding these handles to your selection will help to define the differences in your coffin/casket range.

These zamak-moulded handles are 285 x 45mm and present an astounding 40mm clearance. Colour options include silver, antique-gold, brushed nickel*, and coffee*.

*Sold as package ONLY.

Talk to your coffin manufacturer about getting your hands into some today!

It's new, it's snazzy, and most importantly – it has a TWIST!
